

Not finishing and sealing your door according to the manufacturer guidelines will invalidate your warranty.

GlassCraft offers this service, but if you are hiring another company or doing it yourself please read the GlassCraft manufacturer warranty carefully. This can be found in our FAQ page.

******* Pro Tip: If you can dunk your door slab in water and not a single millimeter of raw wood would get wet, then it is “adequately” sealed. You have to apply at least 3-5 coats of paint/sealant and on every single surface – all 6 sides of the door: front, back, bottom, top, left side and right side. *******

GlassCraft Factory Finish:

***Please note not all finish options are not available for every door.**
